

**Impact Telecom Completes Integration, Extends Network,
Combines Operations and Offerings.**

Company now delivers comprehensive services to the wholesale, commercial and residential markets utilizing one of the nation's largest FGD networks.

DENVER – September 24, 2013 – Impact Telecom (“Impact”), a global provider of voice and data services, today announced the complete integration of all network, support and service activity. The consolidation combines the expertise, customer base and the network and switching facilities of recently acquired Matrix and AmericaTel, including Excel.

“During the third quarter, we repositioned our wholesale offerings and services under a single brand – Impact Telecom. Today, we are operating in all respects as one, unified telecommunications company across wholesale, residential and commercial services. We are guided by the most current technology and driven by the ongoing input of our customers. This combination of service and innovation is at the core of our leadership and growth in the industry,” said Bob Beaty, president and CEO of Impact Telecom.

“Our recent acquisition of Matrix Telecom and AmericaTel was based on growth potential and we have seen our strategy pay off. In just three months, we have diversified our customer base to include more than half a million residential and commercial customers, integrated a great team of experienced professionals and extended our expertise in the entire telecommunications arena. We have re-energized our commitment with significant additional investment in our network and the launch of a robust set of support solutions,” Beaty commented.

The company has unified all deployment, support, and operations activity onto a single platform delivering both effective self-service tools and dedicated account management. In addition, the company's network has been extended to accommodate more capacity and deliver more efficient routing for wholesale, commercial and residential traffic.

Impact Telecom Completes Integration, Combines Operations

Impact Telecom is a leading provider of US domestic and international voice solutions for carriers around the world. As one of the only nationwide Feature Group D (FGD) networks with dedicated service to wholesale voice, and more than 300 carriers connected to its network, Impact offers the most comprehensive solutions for carriers and businesses with wholesale telecommunications needs.

Impact Telecom owns and operates a state-of-the-art Voice over IP network, carrying billions of minutes every month, including one of the largest implementations of an IP-based connection to a comprehensive Feature Group D (FGD) network in the United States. The wide range of Impact Telecom customers benefit from a robust, nationwide Class IV/V VoIP-enabled network forming a mesh of connectivity across U.S. metropolitan markets.

The Impact network provides On-Net coverage of virtually every U.S. LATA and maintains interconnection agreements with more than 300 carriers. Impact's strong global relationships include bi-lateral agreements with more than 50 international carriers and more than 200 premium interconnects with international PTTs.

Impact Telecom will be providing more details about their services, network expansion and plans at the Fall Comptel *PLUS* Convention & EXPO in Orlando, FL, September 23 through September 26.
